

The Wöhler Vereinigung für Anorganische Chemie, a division of the GDCh, and the *European Journal of Inorganic Chemistry* (EurJIC) are pleased to announce the

EurJIC-Wöhler Young Investigator Prize 2021

Call for Nominations

The prize will be awarded to a young scientist of any nationality who has completed a Ph.D. or equivalent degree in Chemistry, for an excellent scientific publication in a field within inorganic chemistry. The selected original research article, in which the candidate appears as one of the correspondence authors, should have been published within two years before the nomination. The nominee will be an independent researcher, but not yet in an established (or tenured) academic or industrial position.

Candidates can be nominated by researchers in industry or academia with responsibility in an appropriate field. Only in exceptional cases will self-nominations be considered.

The selection will be made by a jury of representatives of universities and industry appointed by the board of the Wöhler-Vereinigung, and by members of the Editorial Board of EurJIC. The decision of the jury is final.

The prize comprises a certificate and €1500.- and will be awarded at the Symposium "Highlights in Inorganic Chemistry" of the GDCh-Wissenschaftsforum Chemie to be held in Munich, August 29th – September 1st, 2021. The prize is financially supported by Chemistry Europe, an association of 16 chemical societies from 15 European countries, representing over 75,000 chemists.

The complete nomination must be in English and must comprise a copy of the selected published original research article, a detailed Curriculum Vitae, and a list of scientific publications over the past 3 years of the candidate, and also a thorough justification of the nomination and an appraisal of the work of the nominee by at least one other university professor. For self-nominations, at least two such appraisals are required. Nominations should be submitted in electronic form by March 30th, 2021, to the Wöhler Vereinigung für Anorganische Chemie, GDCh Geschäftsstelle, Dipl.-Biol. Nicole Bürger, n.buerger@gdch.de.
